

Market competitiveness through the mobile device

The primary access to Internet will soon be via a mobile device, not via a computer. Cybercom creates the competitive advantage in this changing environment – by combining great user experience with world class technology. Since 1998, world leading corporations have chosen Cybercom to create mobile services and solutions to reach and exceed their business goals.

Mobile Services

Innovate, create and operate

- Cybercom helps customers to define, create and operate innovative, attractive and enjoyable mobile applications and services.
- Cybercom's user experience and technology experts help customers to create services that attract an audience, willing to spend time and money
- Cybercom's consultants have extensive experience working with mobile platforms including iPhone, iPad, Android, Windows, Bada, MeGoo etc.
- Cybercom's consultants understand the paradigms of different platforms and user expectations
- Cybercom's operation team delivers complete managed services for mobile devices

Cybercom Mobile Services offer:

- Mobile Strategy – how to succeed
- Complete design and development teams
- Business Intelligence – statistics and reporting
- One interface with broad experience, one stop shop
- Established design and development
- Hosting, support and maintenance
- Resource management, including a network of cutting-edge competencies

Examples of our projects:

- Mobile Portals/On-Device Portals
- Mobile Commerce/App Stores
