Cybercom signs framework agreement with OMX

Cybercom signed a frame agreement in its capacity as one of OMX's five preferred suppliers. The two-year contract covers consulting services for project management, system development, and testing.

With the newly acquired auSystems, Cybercom has about 1200 employees with assignments around the world and offices in Denmark, India, Poland, Singapore, Sweden, and the UK. The company offers attractive delivery capacity via global sourcing, which is increasingly in demand from major multinational actors.

"OMX is renowned worldwide for its technological innovations," says Patrik Boman, president and CEO of the Cybercom Group. "Being a preferred supplier is a fantastic opportunity for us. And the show of trust from OMX is an incredible honour. As a preferred supplier, we play a key role going forward and have opportunities for getting many exciting assignments from OMX."

"Our overall intention with this procurement was to secure access to competent IT consultants," says Åke Södermark, head of Development at OMX. "To enable this, we chose to commission fewer suppliers and thus establish more long-term partnerships. We analysed the situation and concluded that the companies we selected will best support us as we head toward future growth."
