Cybercom selected as a centre of excellence for wireless communication

Cybercom signed an agreement with an international automotive manufacturer for consulting on wireless communications for electronic hardware. Cybercom was named a *centre of excellence* and has turnkey responsibility to lead, manage, and quality assure development of wireless electronics solutions.

"This is a long-term commitment and an important milestone for Cybercom," says Patrik Björler, account manager at Automotive Solutions Cybercom in Gothenburg, Sweden. "Our long experience and our engineers' extensive expertise in development for wireless communication systems were crucial factors in the customer's selection process. Our strategy is to work in close partnership with customers to build long-term relationships and stability in our business, while contributing long-term added-value for customers. The customer's show of trust demonstrates that we've succeeded."

As a centre of excellence, Cybercom will operate the project in-house. It has complete responsibility for the product development phase for the customer's wireless communication systems. Cybercom will lead the entire production life cycle, including technical prestudies, system solutions, component selection, supplier contacts, and quality assurance.

Today Cybercom works with several automotive manufacturers, subcontractors, and world leading mobile phone manufacturers to develop systems used in wireless communication solutions.

"I'm convinced that our automotive customers specifically appreciate that we act as a catalyst between the telecom and automotive industries," says Håkan Fernström, business area manager at Automotive Solutions Cybercom in Gothenburg. "We deliver reliable solutions and reapply attractive expertise between the industries. Our local expertise combined with our global delivery capacity also makes us more competitive."
