## **Cybercom develops new Intelligent Dashboard for security company**

**Cybercom has developed an intelligent Guest User Interface for Orion by VingCard Elsafe, part of ASSA ABLOY group. The system makes it is easy and efficient for hotels to analyze data on energy consumption, alarms, room availability and occupancy.**

"No one else in the industry offers a comprehensive dashboard that integrates all the technologies found in Orion by VingCard Elsafe," said David Nowak, Director EMS, Sales & Business Development, VCE Group. "Through the dashboard, hotel operators have the ability to enhance current and future guest experiences like never before. With its innovative layout, design and future-forward capabilities, the Integrated Room Control Dashboard is an important step in helping hoteliers better manage the properties, offer improved guest services, generate additional revenue and save energy."

Cybercom has been selected by VingCard Elsafe to provide the programming for its new Integrated Room Control Dashboard. VingCard Elsafe is offering the interactive, user-friendly dashboard that for the first time integrates in-room electronic systems and status including occupancy, locks, safes, lighting, energy management and more, allowing hotel properties to manage subsystems remotely over the hotel LAN or web-based connection.

"With the Integrated Room Control Dashboard, hotels can get a clear, on-screen overview of how to cut costs by analyzing the room usage through this graphical user interface," says Stefan Christiansen, account manager at Cybercom. "We are excited to have been selected as a part of this team. Together with VingCard Elsafe, we have provided programming for a dashboard that makes a real difference in the productivity of operations for hotels. Using the dashboard information, they can plan for more efficient room use and smarter energy consumption."

The Integrated Room Control Dashboard is an integral part of Orion by VingCard Elsafe, a new intelligent energy management solution. VingCard Elsafe designed its new Energy Management System to automatically control temperature settings as guests travel in and out of their rooms, thereby reducing energy costs while ensuring guest comfort. As it integrates with a hotel's wireless online locks, safes, lights and other networked subsystems, Orion by VingCard Elsafe offers guests the maximum in comfort, safety and efficiency while providing operators unprecedented reporting, tracking, status, control and data access through the Integrated Room Control Dashboard.

**About VingCard Elsafe**

VingCard Elsafe, a world leader in developing locking systems for the hospitality industry, now provides a new energy management solution that offers hoteliers more than temperature control. As the first hospitality security company to develop a complete energy management solution, VingCard Elsafe offers one-of-a-kind value-added security solutions with the integration of its new energy management solution, Orion by VingCard Elsafe. As it continues global leadership in hospitality security, VingCard Elsafe plans for further competitive differentiation through the development and integration of additional wireless innovations – bringing needed solutions to hotel customers.
