## **Cybercom develops Sundsvall Municipality's websites**

**Sundsvall Municipality has chosen Cybercom as its development partner to migrate all its municipal websites into one content management system (CMS).**

With a single CMS platform, Sundsvall Municipality will be able to more rapidly launch user-friendly and cost-effective websites. WordPress, which is the most widely-used CMS platform based on open source, appeals to both editors and developers. Ultimately, this strategic direction will benefit both the municipality and its citizens.

"We are very pleased to have been entrusted with this business by Sundsvall Municipality. We will now be helping them to create user-friendly, accessible and cost-effective solutions using WordPress," says Johan Stenborg, Account Manager, Cybercom.

During this assignment, Cybercom will provide specialist expertise in WordPress, plus development support for all of the municipality's more than 30 websites, including municipal companies. The project starts in January 2015, involves a handful of consultants from Cybercom, and will last for three to four years.

"We chose Cybercom in our procurement largely because of its previous experience of working with WordPress," says Per Lundin, the system administrator at Sundsvall Municipality. "They had a structured approach that would fit well into our development strategy for the web platform."
